NEW QUESTION: 1

An end user has a completely functional mailbox but complains that when using Notify Me to phone is configured with a long distance number, calls are not received. The user is one of the groups of users with this problem. Other users can use long distance numbers for their Notify Me to Phone number successfully. Your testing reveals that the problem is exactly as described using the same long distance number; one user successfully uses Notify Me to Phone and a non working user cannot.

What is causing the problem?

- A. The non working users class of service does not allow long distance dialing from the system.
- B. The non working users do not have extensions that are configured in the switch.
- C. The non working users mailbox configuration is set to disallow long distance dialing from system.
- D. Dialing rules have been configured incorrectly for the system.

Answer: A

NEW QUESTION: 2

How does the RIB differ from the FIB?

NEW QUESTION: 3

Your application contains the following versions of a service level named AuthorizeClaim.

The application is being updated with a new version of the AccountManage ruleset. As part of the update, the service level is no longer circumstanced for AccountOpen cases. The update must retain the circumstancing for the other case types in the application.

Which option do you use to reset the circumstancing for the AccountOpen case type?

A. Make the circumstanced rules in the AccountOpen class unavailable.

B. Withdraw the circumstanced rules in the AccountOpen class.

C. Block the circumstanced rules in the AccountOpen class.

D. Copy the non-circumstanced rule to the AccountOpen class and select the base rule option.

Answer: B

Explanation:
