NEW QUESTION: 1

Company A decided to start using GPO to optimize PCoIP across all their Horizon 7 Desktop pools. During the Proof of Concept (POC) on the local network, there were no performance issues. The company decided to move to UAT. Access from the outside network needs to be tested. Some sales staff traveling to overseas countries, where network speed is low, have reported that the screen quality is degraded during usage. Which setting should be recommended to retain screen quality, regardless of a user's connection?

- A. Configure PCoIP client image cache size policy.
- B. Turn on Build-to-Lossless feature.
- C. Configure the PCoIP session bandwidth floor value.
- D. Configure the maximum PCoIP bandwidth session.

Answer: B
