### NEW QUESTION: 2

A user is planning to schedule a backup for an existing EBS volume. The user wants the backup to be created through snapshot, and for it to be encrypted. How can the user achieve data encryption with a snapshot?

- A. Encrypt the existing EBS volumes so that the snapshot will be encrypted by AWS when it is created
- B. By default the snapshot is encrypted by AWS
- C. Enable server side encryption for the snapshot using S3
- D. While creating a snapshot select the snapshot with encryption

#### Answer: A

Explanation:

Explanation/Reference:

Explanation:

AWS EBS supports encryption of the volume. It also supports creating volumes from existing snapshots provided the snapshots are created from encrypted volumes. The data at rest, the I/O as well as all the snapshots of the encrypted EBS will also be encrypted. EBS encryption is based on the AES-256 cryptographic algorithm, which is the industry standard.
